Hickman Is Only Place For Armor Plant

At first there were 230 towns on the list of those making application for the big government armor plate plant, but this has been cut down, by some process of elimination, to 31, with Hickman running strong. Paducah is, doubtless, our strongest competitor in Kentucky, having already received the endorsement of many commercial clubs and the press association, but whatever advantage she may have by this "pull" will be off-set by the natural and unrivaled, God-given advantages existing at Hickman. From time immemorial, the spot where the thriving City of Hickman now stands has been looked upon as one of nature's fortifications—both by primitive and modern military engineers—and the most logical spot in the adjacent five states to locate an armor plant. Since Hickman has entered the race, it stands to reason that many of the towns less favored by nature, will drop out of the contest to save themselves embarrassment and useless expense; more especially those towns who are forced to tolerate saloons to keep from going broke. It goes without saying that a committee, competent to locate such an important institution as this armor plant, would not be willing to turn loose 8,000 to 12,000 employees in a "wet" town, primarily because the government is not inclined to engage in the erection and maintenance of "coolers." Nevertheless, some of the towns competing should not be criticised, as at the time they entered, it was not generally known that Hickman would decide to become

an active candidate; what they did was done in good faith. But as soon as the activity at Hickman became known at Washington, high officials, representing territory from the Gulf to the Canadian boundary, got busy on the wires and assured us that we had done the right thing, and was surprised that we had not extended the committee our formal invitation earlier. The associations, which had been groping in darkness as to Hickman's intention and untimely committed their indorsement to some of our neighboring cities, are now inclined to recall the original and issue a supplementary endorsement for Hickman. Even Congressman Barkley, whose home town of Paducah wants the plant, is doing all he can legitimately to have the real site at Hickman considered. "Big Ollie" acted wisely in withholding his endorsement of any other town, because he had a hunch 'way back in December that Hickman would swing into line in plenty of time for him to get on the job. It was he, who a few years ago, when Pres. Taft was visiting the good towns along the river, said to Mr. Taft and his distinguished party, "When God created the earth he was pleased, but when he finished the beautiful, time-defying and magnificent hills, of Hickman, He smiled." Ollie knew what he was talking about—and will gladly tell the armor plate committee the same thing. We know it will be a bitter disappointment to some of our neighboring towns to see their hopes dashed and cherished dreams go glimmering; they have our profound sympathy, but in the natural order of things, Hickman is the place for the plant in question, and the committee cannot be expected to discharge its duty with utter disregard to the best interests of the government in the expenditure of such a sum of public money. Later these towns may hope and reasonably expect to come into public recognition by receiving a nice federal fish hatchery, postoffice building, miles of model road, et cetera, which should appease and add much to their municipal growth and civic pride.

The crowning achievement of all things accomplished in Hickman in the last half century, is the building of the levee protecting the west end of town and our factory district. This big embankment, with strength and magnificent proportions, sufficient to withstand wind and water, must give to everyone behind it an ample sense of security, and will warrant the extension of improvements in West Hickman, which never before could be entertained. It means, not only security against the ever occurring calamities of flood, but will bring better homes, better citizens, encouragement to extend development on the part of factories and industries in general, and will divert a great annual loss into a vigorous asset. This levee means more to the future of Hickman than any one step within the recollection of "the oldest inhabitant." Watch us grow.

would aid through the Fiscal Court; at least, he hoped so, if our farmers would like to have the agent.

Among the duties of a farm agent are to aid the farmer in the improvement of soils, the growing and marketing of crops, the improvement and increasing the growth of live stock, the eradication of any disease of plants or animals prevalent in the county or any that might appear, or any other measures tending toward the betterment of our community life, and it is well to mention that his work will put him directly in touch with our younger generation, giving them the advantage of the broad knowledge of the science of agriculture acquired by him in the work at the Kentucky College of Agriculture and the United States department of agriculture, together with his practical experience. Of course, once employed, his services are free to every farmer who asks for them. In some instances, his services are not necessary, as a few farmers will know more than the agent or Luther Burbank; but, those who still desire to learn more about the scientific methods of agriculture, will gain much by having him analyse their soil, teach them how to grow clover in contrary fields—and in a general way, to make two ears of corn grow where only one grew before.

Whether or not the game is worth the candle, we cannot say. However, the government and state think enough of it to stand half the expense, and the farmers in counties which have agents are delighted and would not do without him; so the preponderance of evidence, as our lawyer friends next door would put it, favors the farm agent. What is good for our neighbors ought to be good for us. That there is a lot of haphazard farming done in Fulton county, no one will deny. If the result of the agent's work only brought about an increase sufficient to pay his salary, it would be a good investment; the influence on the future would bring good dividends.

But, the whole thing, in a way,

would have been treated, had the County Agent not been here. This, then, would represent a clear saving of \$2502 to the county, nearly five times as much as is paid the agent by the county.

The agent was instrumental in bringing to Hickman county an expert Entomologist from Department of Entomology and Botany of the Kentucky Experiment Station, who spent six weeks studying the Hessian fly and its danger to the wheat growers of the county. The result of this investigation will be published in the near future and we are able to say that the information furnished by this report, if heeded by the wheat growers of the county will be the means of reducing the damage of the fly to about 10 per cent of its present damage.

He has brought to Hickman county a two-days Farmers Chautauqua with six experts to address the farmers of the county along lines of scientific farming, better farm management and home improvement. He has appeared before the Woman's Club of Clinton and secured the co-operation of its members in getting Miss Mary Sweeney before the farm women of the county, and their co-operation in any work that has for its object the betterment of home conditions of the county.

The agent has been instrumental in starting 74 demonstrations with the farmers that will result in better methods being adopted along the line of hog feeding, wheat growing, alfalfa growing, corn growing, conservation of soil fertility, soil building, community improvement etc.

The agent, in the five months he has been in the county, has visited 289 farmers, representing a travel with horse and buggy of 1885 miles. He has traveled, in pursuing his official duties 1144 miles by rail. He has addressed 36 public meetings with an approximate attendance of 1117 people, has been consulted at his office by 86 people, has been called over the telephone by 63 persons. He has written 374 official letters and has written 13

NAVAL COMMITTEE ASKS FOR HICKMAN DATA.

Another meeting of our business men was held Tuesday afternoon for the purpose of further discussion of ways and means for inducing the government to locate its new \$11,000,000 armor plate works at Hickman. A communication from the Naval Board, asking for freight rates, was read and a committee appointed to make the information and make reply. The committee is composed of Frank Von Borries, R. B. Johnson and R. E. Blow. To give an idea of the volume of freight this plant would receive per year, we take from the schedule the following:

150,000 tons coal gas producer.
150,000 tons steam coal.
200 tons ferromanganese.
60,000 tons pig iron.
2,600 tons Ferrochrome.
4,000 tons nickel ingots.
3,000 tons limestone.
3,000 tons dolomite.

Roughly, this would be about a solid load of freight per day for the plant.

Several telegrams and letters from congressmen and senators were read before the meeting, all of which gave splendid encouragement. It is now almost a certainty that Hickman will be included in the itinerary of the visiting committee—and that's all we ask.

Can it be possible than an "armor plate plant leak" developed here?

On account of a deficiency in the composition of the iron ore product of Alabama, this State has been practically eliminated from the competition for the armor plate works. The same shot also kills Tennessee. Hickman's prospects loom up brighter with each passing day. The thing has narrowed down to available Ohio river shipping point between Dorena, Mo., and Pittsburgh, Pa., with Hickman furnishing a basis for that river's freight rates, an ideal terminal of the shallow waterway and the most logical site on the river.

HICKMAN COUPLE WED IN MICHIGAN.

News was received here Monday afternoon of the marriage of Miss Lyte Reid and Robert B. Coffey, the marriage taking place in Muskegon, Mich., where Mr. Coffey, is with the Page Motor Works. The bride had been visiting Mrs. Leron Taylor, in Cairo, Ills., and was daily expected home, her family having no idea of her intentions. Owing to the groom not being able to get away just now, it was pre-arranged that Miss Lyte meet him in Muskegon, where they were married shortly after she arrived there Monday. Mr. and Mrs. Paul Porter, formerly of this city, attended the wedding. The marriage was the culmination of a childhood courtship and although her family knew they were to marry soon, had no idea of their intentions. The bride is the second daughter of Mrs. Mary J. Reid, and a most charming and accomplished young lady, possessing a wide circle of friends. The groom has lived in Hickman for several years and was popular with all who knew him. He is a nephew of Mrs. Joe L. Amberg.

The Courier wishes this happy young pair a full measure of life's happiness.

They will make their home in Muskegon.

COTTON SEED SUPPLY.

High Prices at Oil Mills Tempt Farmers to Sell—Early Maturing Long Staple Varieties Should Be Saved for Planting.

Washington, Dec. 23.—The Bureau of Plant Industry, United States Department of Agriculture has issued the following statement advising cotton growers to make certain of their supply of seed for planting:

All kinds of cotton seed are likely to be scarce at planting time next spring. The unprecedented prices now being paid for the oil mills may tempt many a farmer to cut down their reserves of planting seed or to sell all of it, perhaps with the idea of being able to buy seed of a better variety for only a little more than the mills are now paying for ordinary gin-run seed. While it is always desirable to replace an inferior stock with a better one, it would be well to make sure of the good planting seed as soon as possible.

Supplies of pure seed are always inadequate, and the department frequently has to tell many correspondents who ask where pure seed of superior variety can be purchased that no more is in sight. Although special efforts are made to keep in touch with farmers who are maintaining pure stocks of any of the varieties that have been distributed by this department, all such stocks are usually exhausted before the planting season arrives.

Special Demand for Long-Staple Seed.

Another danger to the seed supply lies in the possibility that growers who have good seed of superior varieties may think it easier to sell it at once to the oil mill instead of holding it to save for planting. This is a special danger in connection with the new early-maturing long-staple varieties. As only limited supplies of good seed of these varieties are in existence, it may be urged that all of this should be saved for planting purposes. There is an active and rapidly increasing demand for the long staples, with no immediate prospect of overproduction. The present demand is likely to increase as fast as the supply, if the production of such cotton can be established on an adequate scale, so that manufacturers can have the same confidence in being able to secure stocks of long-staple cotton that they have with short staple.—Daily Register.

JANUARY TERM CIRCUIT COURT IS POSTPONED.

Judge Bunk Gardner arrived in Hickman Monday to open the regular term of Fulton Circuit Court, but, owing to the fact that three members of the bar—Will Webb, T. R. Powell and H. J. Moorman—could not be present on account of illness, coupled with the fact that a heavy snow made the roads almost impassable, the judge decided it would serve the best interests of the court and all parties concerned to postpone term at Hickman. He will, however, hold the regular one week term at Fulton next week.

Judge Gardner tells us to make up for the loss of the January term that he will hold court here the last week in April, merging into the regular May term; this giving sufficient time to practically clean up the docket. It is needless to say that jurors and others are glad of the court's decision. Blazing the trail in an unbroken, snow-banked highway is not exactly a "thing of beauty and a joy forever."

The entente reply to President Wilson's peace note received Thursday is regarded in all quarters as putting an early peace practically out of the question, but still leaving an open door for the president to make further efforts. The official view on first consideration is that it constitutes a complete answer to the president's note.

German diplomats regard the reply as even more severe than they expected. They declared it evidence that the enemies of Germany are waging a war of conquest to crush and dismember her. The German allies, they declared, never would agree to any such terms.

President Wilson's next move now becomes the center of attention. It will not be decided upon until a careful and detailed study of the replies of both the central powers and the entente has been made.

The reply of the entente allies to the recent note of President Wilson states the terms upon which peace with the central powers could be obtained, as follows:

Restoration of Belgium, Serbia and Montenegro, and reparation for the damage they have sustained as the result of the war.

The retirement of the Turkish empire from Europe.

The settlement of the problem of Poland according to the plans of the emperor of Russia.

The evacuation of the invaded territory of France, Russia and Roumania, with just reparation.

The restitution of territories previously taken from the entente by force, which is construed to mean Alsace-Lorraine and the Italian Tyrol.

The liberation of Italians, Slavs, Czechs, Roumanians and Slovaks from foreign domination.

The reorganization of Europe, founded upon respect of nationalities, and full security and liberty.

COFFEY IS CANDIDATE FOR COUNTY ASSESSOR.

Wm. T. Coffey, of Hickman, authorizes the Courier to announce him as a candidate for the Democratic nomination of Assessor of Fulton county, subject, of course, to the regular primary.

In placing the name of Mr. Coffey before the voters of Fulton county, we feel that too much cannot be said in his favor. This gentleman—and he is of the old school—is about 63 years old, and has voted the Democratic ticket since he was old enough, but never before has he asked for an office of any kind. His entrance into the present race is largely the result of solicitation of friends; people who know and appreciate him as a man and citizen. He has lived in Hickman for the past 14 years, earning his livelihood as a carpenter. Just here, we want to say that few men, as badly crippled as he is, would have had the determination and pluck he has shown. Instead of going to their daily task on crutches, they would have been living at the expense of the county. Mr. Coffey's injury is the result of an accident twenty-two years ago, when he had a leg broken in four places; blood poison developed and has been a source of pain and aggravation ever since. But, withal, he has continued to make an honest, honorable living. He has not asked us to "play up to the public sympathy" for his benefit; on the contrary, we mention this of our accord, in order to show the character of the man.

His qualifications, we are sure, are ample; his honesty and character above reproach, and in all respects, he is what we call a plain, every-day, gentleman; full of energy, honesty of purpose, good habits, an honorable citizen—and a man who would make our county a good assessor. Don't forget him on Saturday, Aug 4th.

T. F. LINTON, OF FULTON RUNS FOR JAILER.

T. F. Linton, one of Fulton's most respected citizens, was down this week getting acquainted with the voters in this end of the county. He harked to the buzzing of the political bee, and is now a full fledged candidate for the office of Jailer of Fulton county, subject to the action of the Democratic primary. Mr. Linton has been a citizen of Fulton since a mere boy, and by trade is a carpenter and contractor. The Courier is not personally acquainted with him, but his reputation is excellent, and we take it that he is a man fully qualified to fill this responsible position.

In announcing him as a candidate, Mr. Linton's home paper, in part, had the following to say: "This is the first county office Mr. Linton has ever asked for, although he has been a resident of the county practically all of his life, working for the best interests of Democracy. He is a man of sterling qualities, a thoroughbred Democrat, competent in every way to fill the office which he is seeking with perfect satisfaction. For six years he was a member of the Fulton city council where he served with credit to himself and the people who elected him. In asking for the office of Jailer he fully realizes the responsibilities and duties attached to same and if elected will serve the people conscientiously to the best of his ability. With this understanding he earnestly asks your support for the office."

FIRST M. E. CHURCH.

Services for Sunday, Jan. 21, will be as follows:

Sunday School 9:45 a. m., F. T. Randle, Supt.

Worship at 11 a. m. and 7:15 p. m., with sermons by the pastor. Subjects: "Making Faces," and "Lessons From Blind Bartimaeus," respectively.

Epworth League at 6:30 p. m. Subject, "Seeing the good in Others," Phil. 2 1-11.

Last Sunday was Connectional Day. We did well considering the weather. The pastor, through his missionary committee, issued two hundred and fifty calls to as many members. Sixty responded and the total amount was fifty-five dollars. This is for one quarter. Now if the other two hundred will respond by next Sunday, see how easily we will get our connectional claims by the end of the year. Dear members, do not wait until the last minute to meet its obligation. Our Home Missionaries are needing their salary. We have one in our own town, who is paying board and your pastor ventures the assertion that he has not received money enough to pay one month's board.

One of our members lives in Blissville, Ark., and was sent a call the same as the members who live in Hickman. It was mailed to him on Friday, last, and on Monday, the pastor received the following, refreshing and exhilarating reply: "Dear Bro. Douglass: I attach hereto my check for four dollars, in payment of the amount I am assessed for Benevolences, for the year 1917. Trusting that you may be successful in collecting the entire \$550 and also have great success in all other branches of the work, I am, Your brother
Brother pastors, how would you like to have a whole congregation of such stripe as the above? You need not answer, for we all know.—R. C. Douglass, pastor."

NIGHT WATCHMAN HURT.

Bob Davis, the night watchman on the St. Mengel Box Co., happened to a serious and painful accident on Friday night when the steamer was attempting to land during a storm. He was out on one of the log barges as they were landing, a barge swinging in and striking a tree on the bank, which fell over on Mr. Davis, striking him across the back and knocking him down. There were ice and snow on the logs and he could not be carried back to the steamer over the barges but was conveyed by skiff off the barge and back to the boat. Owing to weather condition and being several miles this side of Caruthersville they were unable to secure a doctor until reaching here Sunday, when Dr. H. E. Prather gave him attention, his injuries not being as serious as at first feared but his back was wrenched and badly bruised and his condition being very painful.

KILLS

MRS. HERTWECK AT REST. END CAME AT CAIRO.

Mrs. Otto Hertweck, formerly of Hickman, died at the home of her daughter, Mrs. Rilla Ford, at Cairo, Ills., yesterday morning at eight o'clock, after a brief illness of pneumonia.

The news of Mrs. Hertweck's death came as a shock to her many friends in this city. She and her husband, after residing here more than a half century, went to Cairo about five years ago to make their home. Mrs. Hertweck was nearly 76 years of age, and was born in New York City, June 2, 1839, leaving that place at the age of about three years.

This good lady survived by her husband and seven children—Mrs. Percy Jones, of Hickman; Mrs. Ida Goldberg, of St. Parish, Ohio; Mrs. J. R. Ford, of Cairo; and Harry Hertweck, of Kansas; Ben Hertweck, of Clarksdale, Miss; Roy Hertweck, of Memphis; and Arch Hertweck, of Hickman. The funeral will be held at Hickman Friday.

The bereaved relatives and friends have our sincere sympathy. No better lady ever lived, and her life was one example of beautiful Christian womanhood.

LOST, STRAYED OR STOLEN.

One bay mare mule about 14½ hands high, 8 years old, branded J. B. on left shoulder, over bit and underbit in left ear. Last seen at Tyler, Ky., with bridle on. Reward. Notify S. K. Barnes, Rfd. 1, Troy, Tenn., or F. R. Robertson, Rfd. 5, Hickman, Ky.

There is a very persistent rumor in circulation that the Hickman branch of the Mengel Box Co. is to be greatly enlarged in the very near future. Madame Rumor even goes so far as to say the plant will be almost doubled in size, but the wise old dame doesn't tell us for what particular product or in what way the increase is to be made. It is an open secret that this great plant, with its vast output, is away behind with orders for its veneered product. A logical conclusion would be that the veneering capacity is to be increased to meet the growing demand. Let this be as it may, it is the enlargement we are interested in and trust it will materialize. Hickman is slated for big things for 1917; all we need is a little co-operation down the line, which could be best handled through a live commercial club.

It is rather a difficult matter to even hint about fixing the responsibility, but Dr. A. O. Longnecker tells us that John Pyle came up Monday morning with a cold wave story from "Black Bottom" that borders a little on sensationalism. As the story goes, John "banked" a big fire in his wife's kitchen range Sunday night, to hold fire over for Monday morning. The fire kept alright; it was only necessary to give the grate a feeble jerk—and off she went. But, a teakettle, filled with water and sitting on the stove—froze and bursted—7—:—!

F. & M. BANK WILL ENLARGE BANKING HOUSE.

With its volume of business increasing daily, the Farmers & Merchants Bank, of Hickman, one of Fulton county's strongest financial institutions, finds itself about to out-grow its present quarters, and plans are under way to increase their space.

The initial step in this direction was taken last week when the Board of Directors purchased from T. A. Ledford the C. F. Baltzer building, adjoining the bank building. While plans and specifications have not been drafted, it is understood that the bank will make such changes as are necessary to throw both buildings into one. This will give them almost double the floor space they now have, but no more than will be needed. Other improvements, of course, will go along with the contemplated increase in space.

OVER 800 HAVE QUIT.

It is said that more than eight hundred newspapers in the United States have been suspended on account of the high price of print paper. It is likely that many more will go the same route if the prices hold to the present standard. Not only is it likely to hold up but indications point to a still greater advance. The present shows advances of about 300 per cent over the prevailing prices of a year ago. There is, of course, some reason for an advance in the price but certainly no good reason for an advance of 300 per cent. We are told that the big dailies are now buying paper for about 3½ cents per pound. Now, certainly, a government that can do anything at all could regulate such a discrimination as that.—Sentinel.

LOUISVILLE, KY.

HUGHES IS NOW MANAGER. JUNEY IS ADVANCED.

The Kentucky Light & Power Co. is making changes in the local management, really effective the first of the year, but just now becoming operative.

Doyle Junej, local manager, and connected with the Hickman plant for a number of years, has been jumped up to Chief Auditor and will have entire charge of the commercial departments of the four plants owned and operated by his company. He will go to Fulton, where the office work will be centralized. In a way, he succeeds Dawson Skeen, stationed at Fulton, who will now act as Chief Engineer. Supt. Burney Hughes, who has also been connected with the plant for the past eleven years, succeeds Mr. Junej as local manager, and Geo. O. Stewart, of Indianapolis, also for several years with this company, will be assistant manager. No one is better qualified for local manager than Mr. Hughes, as he is particularly familiar with local conditions and knows the game. He has been instrumental in giving Hickman service as good as Chicago or any other town. Hickman's water and light service is all, and Mr. Hughes may be depended upon to keep it up to the present standard. Since a large part of the bookkeeping for this plant will be handled at Fulton, Mr. Hughes will be able to act as both manager and superintendent for the Hickman property.

The Kentucky Light & Power Co. now owns plants at Hickman, Fulton, Princeton and Dawson Springs, Ky. But Hickman is the only point where they have ice plant and water works in connection with the light and power business, which means, of course, that Hickman is their biggest and most important property.

The Courier regrets that Hickman is to lose Mr. Junej. He is a live wire and a citizen any town will be proud of, but he deserves to go on up with his company, and we predict that his ultimate address will be Chicago—where the head offices of the company are located.

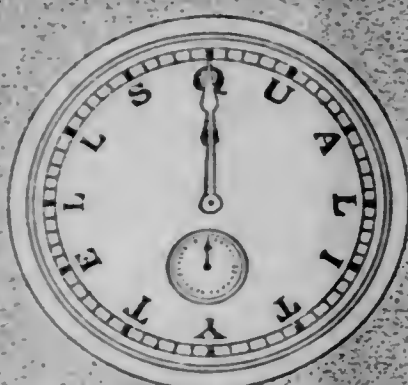

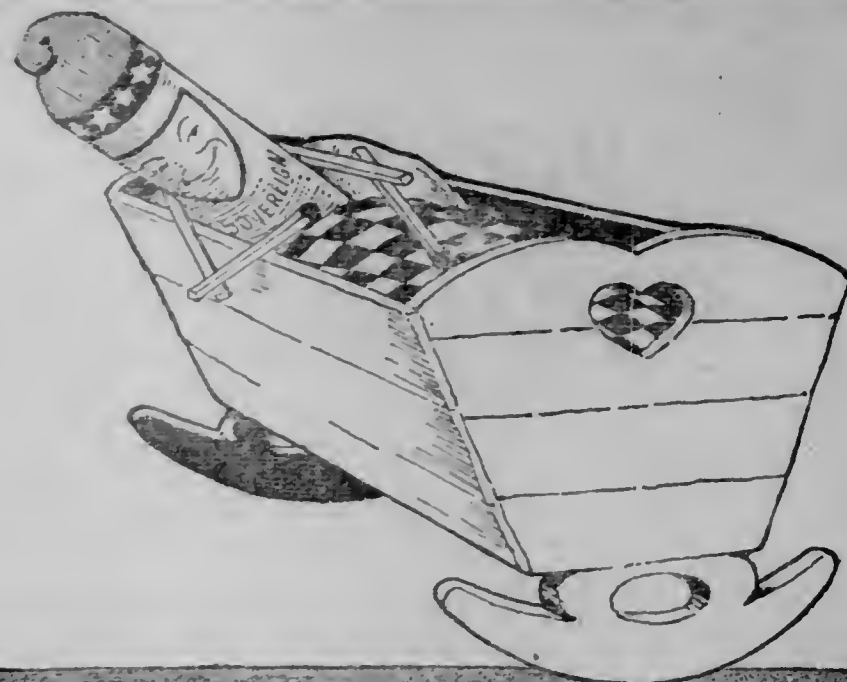

Drives Out Malaria, Builds Up System

The Old Standard general strengthening tonic, GROVE'S TASTELESS CHILL TONIC, drives out Malaria, enriches the blood, and builds up the system. A true tonic. For adults and children. 50c.

Plans for the building of 13 miles of new railroad into the coal producing section of Grundy county have just been approved by President Peyton of the N. C. & St. Railway, and already the big steam shovels of the construction forces are on the ground ready to start work. The new line will be an extension of the Tracy City branch of the system. The people of Hickman are ready to listen to anything that sounds like a reduction in the price of coal, as \$6.50 a ton certainly gets our goat. The announcement of this extension doesn't excite our enthusiasm along economical lines; it hasn't even the faintest resemblance to a reduction of that \$1.50 a ton freight rate, recently saddled on a helpless public. But, we do see a rift in the dark, overcast, in plans which are well matured here for again receiving coal by river. A financially responsible firm now has in hand a complete set of blue prints; a draft of an up-to-date unloading plant for handling barge coal at Hickman. This will at least cut off 50¢ a ton in the saving of freight, as river coal can be handled for \$1 a ton freight. Every business man, every factory, every private citizen will profit by this unloading plant and should not hesitate to sign a long time contract with the promoters. It now begins to look as though the railroads have killed the goose that laid the golden egg. For years they have had it all their own way, our former river unloading facilities having been starved by a low rate. This was followed by an advance to \$1.25 a ton; then \$1.50—and nothing to stop further advances, except an unloading plant. Memphis has a very decent rate, because she maintains unloading facilities—much lower than the Hickman rate, we are told, even though it is a longer haul to Memphis. Another item not to be overlooked is the fact we can get better coal by river than rail. It seems to us that the time is ripe to go back to river coal, and we're glad plans are under way for putting up an electrically driven unloading device.

It Was Midnight November 4th 1901. In Durham, N.C.

It was midnight, cold and dark. The calendar told the date—Monday, November 4th, 1901. They tell me I opened my eyes and blinked in the glare of the big electric lights. Around me were men in spotless white talking in low tones.

"Jim," one said, "we have been watching for this little fellow for a long while and now he's here."

Jim picked me up, looked me over, struck a match and took a long, deep puff. Then he took another.

"Gentlemen," he said, "He is perfect. Quality does tell. You can't fail to recognize good blood. His mother was a Virginian, his father an aristocrat of the Carolinas. He comes from the very best stock—the very sweetest, ripest, mellowest Virginia and Carolina tobacco, and we will raise him right in one of the whitest, cleanest, healthiest homes on earth."

Even then I was glad all over to hear his words. It is a great thing to have real breeding behind you, to know who your folks are. It starts a fellow right.

We Folks of the South KNOW good blood.

We Folks of the South KNOW good tobacco.

That is why I just had to have heaps of friends down South here. I want *you*, Mr. Reader, for one of my friends, and it means a whole lot when I say—

I am guaranteed by *The American Tobacco Co.* —Buy me. If you don't like me return me to your dealer and get your money back. I have said it. A Southern gentleman is known the world over for keeping his word, and I have given you mine.

IN A LAND OF PLENTY.

James Annillier, aged 66 years, who located in the vicinity of Augusta several months ago, was taken from a small tent on the banks of the Ohio River by county officials, suffering from badly frozen feet and legs. Annillier had stretched a piece of tarpaulin over a pole and had slept under this light covering on the ground during all of the present winter. When found he was surrounded by ten hens, which he had raised, all huddled over a small fire. The man was sent to the infirmary and is in a serious condition.

News Snapshots Of the Week

After a protracted delay and following a final conference in Rome, Premier Briand of France handed Ambassador Sharp the allied reply to President Wilson's call for terms of the belligerents. The famous peace note "leak" inquiry before the rules committee of congress absolved all those mentioned in rumors as having no advance knowledge of the note, while Thomas W. Lawson's so-called "revelations" revealed nothing. Again Harry K. Thaw, slayer of Stanford White, ran afoul of the law, being accused of horsewhipping a nineteen-year-old high school boy, Frederick Gump, Jr.; later Thaw cut his own throat in Philadelphia. After a lingering illness William F. Cody (Buffalo Bill) died in Denver. The four railroad brotherhoods, after voting another strike if necessary, awaited the outcome of the fight before the supreme court on the eight hour law's constitutionality. Police rookies of New York were put on a diet to prove seven cent meals are enough to live on.

MRS. MAC ADAMS DIED SUDDENLY IN N. MEX.

Mrs. C. M. Adams, formerly of this city but who has made her home in Roswell, New Mexico, since 1912, died at her home in that city very unexpectedly Sunday morning, following a stroke of paralysis. She was apparently in good health even up to Saturday night, as letters she had written of that date indicated. Her daughter, Miss Hazel, who just arrived in Hickman Friday, accompanied by her brother, E. W. Adams, left Monday for Roswell. Funeral arrangements are not known here, but the burial will likely occur in New Mexico.

Mrs. Adams is survived by her husband, and daughter, Miss Hazel, and three sons—Edward, John and Wess. She was 63 years of age, a member of the Methodist church and a daughter of the late Wess Powell. Most of her life was spent in Hickman, where she has a host of friends to mourn her loss. She went west in the hope of benefitting the health of her daughter, Miss Alex, who died three years ago, and has continued to reside there. Those who knew her best, say Mrs. Adams was a most excellent, Christian lady.

The bereaved have our sympathy.

Security For Your Live Stock

of every kind, and for your fields of growing crops, is what you want, and what you have a right to expect, when you buy fence. A fence that a bull can break through or break down is not worth paying good money for. You want weight in the fence you buy, weight enough to turn the heaviest Percheron or stop a "devil wagon." Now, it is a fact—and you should know it—that, per running rod, you obtain the most weight in wire that is given in any fence, in the celebrated

AMERICAN FENCE

It is made on purpose to be the heaviest, most durable and lasting of any fence at any price. It is made and sold in larger quantities than any other two fences in the world, solely on its merits. The makers of AMERICAN FENCE own and operate their own iron mines and furnaces, their own wire mills and six immense fence factories. Their product is the acknowledged

STANDARD OF THE WORLD

We can show you this fence in our stock and explain its merits and superiority, not only in the roll but in the field. Come and see us.

DRIVING OUT CATARRH

If people knew how the presence of catarrh is a constant menace, they would have none of it. It infests some part of the delicately adjusted body and makes it useless, thus throwing on the other organs more than their share of work. It affords a carefully prepared seed-bed for the germs of colds, grip, tuberculosis and pneumonia. It so disarranges Nature's delicate plans as to make possible asthma, hay fever and other respiratory disorders. It spreads until it becomes systemic, thus involving many organs and debilitating the entire system with serious results. Catarrh is easily neglected, and it rarely gets well of itself. It needs proper medicinal correction. For almost half a century many thousands have found help in Ferruna, a valuable tonic with special efficacy in catarrhal conditions. The aim is to clean out waste matter, to dispel the catarrhal inflammation, and tone up the whole system. It has done all this and even more for catarrhal sufferers. What it has done is the best proof of what it will do. You may rely on Ferruna. In tablet form it is pleasant to take and easy to administer.

IN MEMORY OF MRS. ALLIE M. ANDREWS.

We buried poor Allie in the cemetery there,

In the cold, cold ground that looks so bare.

She has paid the debt we all shall pay

For God says we must all go that way.

She called her sister to her bed,

And these were the words she feebly said:

"I have a presentiment that I am going to die

There, there, now, please don't cry."

For I am going to a home not made with hands,

Where the angels are playing the golden band.

Where there'll be no pain or suffering or care,

Nothing but peace and happiness up there.

My dear old mother, I regret to leave,

Comfort her and tell her not to grieve.

Her journey of life will soon be o'er,

And then we'll meet to part no more.

My sweet little children, teach them to pray,

For they have before them a narrow way.

Tell them mamma has gone on before

To wait for them on the other shore.

Dear husband, when you see my vacant chair,

Don't say I wish that Allie was there.

God has made me a better place

To wait and welcome your smiling face.

Dear brothers and sisters, meet me in Heaven.

The Lord said: "Ask and it shall be given."

Now begin today, before its too late

So you can enter the "Golden Gate."

So farewell, kind friends, to one and all,

I hear the voice of the angel's call.

Don't grieve after me, for it isn't right,

When the way to heaven is looking so bright.

COTTON STILL KING—DIVERSIFICATION A PRINCE.

Northern observers are looking with envious eyes at the present prosperity of the southern farmer. They are filling columns in the newspapers and magazines with tales of the great wealth pouring into the states south of the Mason-Dixon line.

The cause of envy is this: The present business boom in the northern States is based largely on the filling of huge war contracts, the manufacture of munitions, the wartime price of steel, iron, copper, etc., the closing of the Russian wheat supply, the breaking down of normal trade and business relations, and all the gambling and manipulations, that followed as a result. On the other hand, the prosperity which prevails in the South is due to a better system of agriculture, which came about largely on account of the war, but which will continue to bring increased wealth into the Southern States whether the war ends tomorrow or goes on for a dozen years.

The past two years have seen great changes in Southern agriculture. Cotton is still king, but it is no longer a tyrant. Diversification of crops is increasing, and never again will the Southern farmer be caught as he was in 1914. He is reducing his cotton acreage and in its place is raising the food crops and the livestock necessary to a good system of agriculture. He has learned to raise his crop at reduced cost, and knows the profit which comes to him who can feed his family, his hands and his livestock from the produce he raises on his own farm.

The boldest prophet does not dare predict what will happen in America at the close of the European war; but this we can say safely, that the Southern States have handled few war orders and it is not likely that many of us will feel the loss when those that we have are cut off.

TRY IT! SUBSTITUTE FOR NASTY CALOMEL.

Starts Your Liver Without Making You Sick And Can Not Salivate.

Every druggist in town—your druggist and everybody's druggist has noticed a great falling-off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle costs 50 cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasant and safe, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headaches, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tone instead and feel fine, full of vigor and ambition. Advt.

Too Ill to Walk Upright. Operation Advised. Saved by Lydia E. Pinkham's Vegetable Compound.

This woman now raises chickens and does manual labor. Read her story: Richmond, Ind.—"For two years I was so sick and weak with troubles from my age that when going up stairs I had to go very slowly with my hands on the steps, then sit down at the top to rest. The doctor said he thought I should have an operation, and my friends thought I wouldn't live to move into our new house. My daughter asked me to try Lydia E. Pinkham's Vegetable Compound as she had taken it with good results. I did so, my weakness disappeared, I gained in strength, moved into our new home, did all kinds of garden work, shoveled dirt, did building and cement work, and raised hundreds of chickens and ducks. I cannot say enough in praise of Lydia E. Pinkham's Vegetable Compound and if these facts are useful you may publish them for the benefit of other women."—Mrs. M. O. JOHNSON, Route D, Box 190, Richmond, Ind.

to try Lydia E. Pinkham's Vegetable Compound as she had taken it with good results. I did so, my weakness disappeared, I gained in strength, moved into our new home, did all kinds of garden work, shoveled dirt, did building and cement work, and raised hundreds of chickens and ducks. I cannot say enough in praise of Lydia E. Pinkham's Vegetable Compound and if these facts are useful you may publish them for the benefit of other women."—Mrs. M. O. JOHNSON, Route D, Box 190, Richmond, Ind.

A WASTE OF MONEY.

On January 5th, by a vote of 44 to 73, the House approved, in the usual way, the appropriation for the distribution of free garden seeds. As adopted, this appropriation carries \$244,000.

We wish the farmers themselves would make a protest against this form of distribution. The original idea of free seeds was that they would be seeds of rare varieties of flowers, vegetables or grain. It would be an experimental undertaking; but it has long ceased to be anything of the kind. The government buys certain seeds from certain merchants at wholesale and distributes them promiscuously throughout the country, and then they say to the farmers: "See what we are doing for you."

CALOMEL CLAIMS MANY VICTIMS.

Science Has At Last Discovered A Substitute For It.

Very few realize how many people are salivated by calomel each year. Every one who has taken this dangerous drug knows that it gripes, sickens and is very unpleasant to take but all who do not know that while it acts violently on the liver that it softens the bone and is liable at any time to salivate them. Many doctors dislike to prescribe it as they would any other poisonous drug and some doctors refuse to give it to their patients. It is for these reasons that men of science have been patiently searching for a substitute for dangerous calomel and have at last discovered medicine that possesses the virtues of calomel without the dangerous and unpleasant after-effects. This new medicine is called LEMOLAC and is now on sale at Helm & Ellison's Drug Store.

P. S. If you forget the name spell calomel backwards.

With the discovery that Osage orange hedge tree roots can be utilized in the manufacture of the substitute for dyes of German make, farmers in Kansas are grubbing out their hedge fences and disposing of the roots to buyers of Eastern dye manufacturing concerns.

Of the three evils—the corset, white plague and whiskey—the corset is the greatest. This is the declaration of Mrs. Anna Lee, who has drafted for introduction in the Indiana Legislature a bill prohibiting the manufacture of corsets.

THAW BOBS UP AGAIN.

Harry Rendall Thaw, under indictment in New York, together with two so-called bodyguards, for an alleged attack on Frederick Gimpp, Jr., a 19-year old high school youth of Kansas City, in a New York hotel last Christmas, attempted suicide in a house Thursday at Philadelphia, by cutting his throat and wrists with a razor. Thaw's attempt at self-destruction was a sensational climax to a hunt which began Tuesday, following the announcement by District Attorney Swan, of New York, of the latest episode in the erratic career of the wealthy Pittsburgher, who killed Stanford White in New York and later escaped from Mattewan asylum.
